不止生产衣服，更把设计语言转换成可量产工艺

Beyond garment manufacturing - we turn design concepts into production-ready solutions.

围绕品牌需求组织开发、制造与交付 | We organize development, manufacturing and delivery around brand requirements.

01

设计转译

Design Translation

把款式图、样衣或灵感图拆解为纱线、针法、克重和工艺方案。

We translate sketches, reference samples and design concepts intopractical fabric, construction, specification and production solutions.

02

针织工程

Knit Engineering

围绕版型、组织、收放针、提花与嵌花建立可复制工艺。

We develop production-ready knit structures covering stitchconstruc-tion, shaping, jacquard and intarsia techniques.

03

柔性制造

Flexible Manufacturing

支持系列开发、小批试单与后续返单的节奏衔接。

We support collection develop-ment, small-batch trial orders and flexible production planning for repeat orders.

04

品质闭环

End-to-End Quality Control

从原料、半成品到成衣设置关键检验节点与问题追踪。

Key inspection checkpoints are implemented from raw materials andsemi-finished goods through to finished garments.

MINGLANG核心价值：

更快确认样品 · **更清楚控制**风险 · **更稳定**完成批量交付

We ensure more consistent bulk production, faster sample approval and better production risk control.

生产设备 Production Equipment

我们率先引入一系列高精度、全自动的先进设备，构建了从面料裁剪到成衣缝制的智能生产线。相比传统工厂，我们的自动化设备显著提升了生产效率和产品一致性，同时大幅降低了人为误差。

自动拖布与裁剪系统：实现面料无损铺布与高精度切割
模版化缝制集群：自动开袋、自动做领、自动送扣打扣，复杂工序一次成型
全自动锁眼与钉扣：稳定可靠，提升衬衫、外套等品类品质
特种缝纫线：套结、包缝、锁边、多针机等，满足针织与梭织双重需求
智能后整理：烫台与吸毛头设备，确保成品洁净平整

We have taken the lead in introducing a series of high-precision, fully automatic advanced equipment, establishing an intelligent production line from fabric cutting to garment sewing. Compared to traditional factories, our automation significantly improves efficiency and product consistency while greatly reducing human error.
